Duties:

• Performing mold changes, tooling installation, machine setup, and production start-ups;
• Adjusting and operating machine parameters, temperatures, flow rates, and cycle times to optimize production;
• Troubleshooting, diagnosing and correcting injection-molding defects, including short shots, flash, warping, and surface irregularities;
• Verifying material resins, programming colour concentrates, and completing barrel-purging procedures;
• Monitoring process stability and ensuring finished products meet specifications and quality standards;
• Programming, operating, and troubleshooting take-out robots and other automated equipment;
• Designing, assembling, and maintaining End-of-Arm Tooling;
• Completing required ISO documentation, quality records, production reports, and process logs;
• Ensuring machines operate according to approved parameter data sheets and documenting any required deviations;
• Maintaining a clean and organized workplace in accordance with 5S standards;
• Following all health and safety requirements, including Lockout/Tagout procedures; and
• Performing other related duties that may reasonably be assigned by the Company.

Requirements:

• Completion of secondary school is required
• 5+ years of experience working with injection Moulding
• In-depth knowledge of plastic production processes
• Strong mechanical aptitude and working knowledge of hydraulic, pneumatic, and electrical systems
• Previous experience using hand tools and performing troubleshooting and problem-solving within a manufacturing environment.
• Ability to work independently and as part of a team
• Strong English communications skills (written and verbal)
• Skilled at multitasking and has strong organizational skills
• This is an on-site position; candidates are expected to work from our facility five days per week
